

- **About GoodBoy**

GoodBoy is a community-driven meme project that demonstrate how a meme coin can be built in transparent, fair, and responsible way. GoodBoy is not just about price action, its about the process of collective learning, exploring how a community can grow with integrity, discipline, and good character.

Within GoodBoy community, we promote education, creativity, and active participation to cultivate awareness, responsibility, and positive value. Becoming a GoodBoy in a truest sense. GoodBoy was created as a response to low-trust meme tokens and opaque launches. It aims to show that a meme coin can be honest, educational, and community-oriented.

- **Vision and Philosophy**

GoodBoy is designed for long-term sustainability rather than short-term speculation. Liquidity grows from usage. The system prioritizes transparency, low risk, and gradual organic growth. The core philosophy of GoodBoy is character building. We believe that strong communities are built on values, discipline, and transparency.

The community of holders and participants contribute to the organic growth and evolution of the ecosystem through their engagement and participation. GoodBoy future is guided by this community input, which ensures ongoing development aligns with the interests of its participants. Community allocation is distributed through events, contests, and participation rewards. Education content focuses on building strong personal character.

- **Tokenomics**

GoodBoy is built on the BNB blockchain using the BEP-20 standard to ensure security, usability, and efficiency. It is designed with a fair automatic liquidity smart contract system and a fee structure that can only be reduced or disabled. We developed this system to support transparent and organic growth of both the community and the market.

Once the liquidity target is achieved, transaction fees and the automatic liquidity mechanism will be disabled, along with contract ownership renounced from the team and developers.

Key Information :

1. Fixed Total Supply : 100 million \$GOBO tokens
2. Contract Mechanism : Automatic liquidity, fee reduction, and fee deactivation
3. Lock Supply : Liquidity pool, treasury, and developer allocation are 100% locked
4. LP Target for Full Decentralization: GOBO / 1000 BNB
5. Fee model :Buy Fee 1%, Sell Fee 2%

- Future Ecosystem

GoodBoy is created as a community-driven meme project aimed at building the initial branding of our foundation, which focuses on character education. Through this approach, we seek to create an identity that is easily recognized, emotionally engaging, and deeply connected to our core values.

The expansion of our ecosystem will later be directed toward Layer-1, Layer-2, RWA, or stablecoin initiatives, once the GoodBoy community has grown and reached maturity as a foundational project. This phased development ensures that every innovation is built on a strong, stable, and value-driven community base.

Most importantly, within our foundation's ecosystem, GoodBoy will always remain the core asset and serve as the public face of our organization, "GoodBoy Foundation." It represents our principles, vision, and long-term commitment to integrity, education, and social impact. Through GoodBoy, we aim to inspire trust, foster collaboration, and establish a sustainable legacy that reflects the true spirit of our foundation.

- **Disclaimer**

This whitepaper is provided solely for informational and reference purposes regarding the GoodBoy Ecosystem, including the GOBO token, platform features, educational initiatives, and related digital services developed by the team.

All information in this document is presented in good faith based on data and research available at the time of publication. However, this whitepaper does not constitute, and shall not be interpreted as, an offer to invest, a solicitation to purchase, financial advice, legal advice, tax advice, or any form of promotion of financial instruments.

Participation in the platform, ownership of tokens, and involvement in the ecosystem are entirely voluntary and based on individual judgment. Each user is solely responsible for their own decisions and accepts all associated risks, including the potential loss of some or all digital asset value.

The blockchain, cryptocurrency, and Web3 sectors are experimental, volatile, and subject to high levels of risk. Regulatory changes, market fluctuations, technological developments, and external factors may impact the operation, value, and long-term sustainability of this project.

Users and potential participants are strongly encouraged to conduct independent research (DYOR) and consult qualified professional advisors before making any decisions related to this project.

Users are responsible for complying with all applicable laws and regulations in their respective jurisdictions. This project does not guarantee service availability in all regions.

By accessing, using, or participating in the GoodBoy ecosystem, users acknowledge that they have read, understood, and agreed to this disclaimer in full. This disclaimer forms an integral part of the whitepaper and may be revised in accordance with project developments and regulatory requirements.
